#### The 10 CCG/TCG Cardinal Rules

- 1 It is a card game and not only a trading cards set. So, there are rules to play, normally included in starters or boosters.
- 2 Cards must "physically" available (i.e. printed) and they can be played with. Therefore, games only available on-line or games where printed cards are simply used to receive codes for the on-line play are not included (e.g. Bella Sara, or Eye of Judgement for PlayStation 3).
- 3 Playing decks are different for each player and they must be built according with defined rules (maximum number of cards, number of copies for each card, etc.).
- 4 Different sets of cards are available. Cards belonging to expansion sets are fully compatible with the base set, with the exception of banned or limited cards, which can be used only in specific formats (e.g. "Standard", "Block" or "Vintage" tournaments for Magic: the Gathering).
- 5 Rules of play have some random mechanisms: decks are shuffled and the starting hand of each player is always different.
- 6 Card backs are normally identical, or there is a limited number of backs, in order to distinguish different cards types (e.g. Dynasty and Fate cards in the Legend of the 5 Rings CCG).
- 7 Cards are sold in sealed decks and boosters, which contain a limited subset of the cards available in that specific expansion set.
- 8 Cards in decks and boosters have different rarities (usually, there are three levels of rarity: common, uncommon and rare). There can be also "fixed" cards, available only in starter decks. Rarity level can be shown with specific symbols (in many CCG, it is a star ★).
- 9 The distribution of cards in starters and boosters is random, but there are general rules (e.g., a 15 cards booster has 1 rare, 3 uncommon and 11 common cards; or, there is a foil every 6 boosters).
- 10 Cards have a standard format (3.5" x 2.5", about 89 x 64 mm.). A smaller format "Carddas" (about 86 x 59 mm.) is also frequently used, mainly in Japanese games (e.g. Yu-Gi-Oh!). Sometimes, cards have special formats (e.g. Heresy or Baseball 3010 CCG).

N.B. Rules *in italics* (6-10) are common but optional: a game can be considered a real CCG/TCG even if those rules are not fully respected: There are games without levels of rarity but clearly collectible (e.g. *Arcadia*), while the lack of expansions of a CCG can simply be explained with its commercial failure.
